

Payroll

The confidential processing of your Payroll both monthly and weekly. We take care of all the red tape, dealing with SSP, SPM, SPP and anything else that needs dealing with.

How does it work?

We visit you and discuss your requirements in this very sensitive area. We get a thorough understanding of what you expect to make sure you get the results you expect. Internally we make sure our systems will be easy to operate and work with your organization. In general you will probably have your payroll being processed. We can lift this from your office and deal with it at our office ensuring confidentiality. We take care of the payments as well, direct from your bank to your employee using the bacstel system. No payroll information will ever need to be at your office again. Year end p35's are also taken care of.

What to do next

Contact Mark Leece the Payroll manager and arrange for him to take this headache away.

Where is it needed?

In most SME's there is no Payroll department. Confidentiality is hard to maintain, and Pay and Payroll generally gets left with an employee with little training or knowledge. This can lead to costly mistakes. Also once confidentiality has been breached disruption follows and ill feeling. None of this is productive to your business. Take away the problem and get it outsourced.

The benefits.

For one fee you will have complete piece of mind. No more worries about confidentiality and compliance we take care of it all. Weekly and monthly routines are computerized guaranteeing accuracy and then pulling together the year end is simple and accurate.
